PROFESSIONAL SUMMARY

Full-stack engineer with 5 years of professional experience, the last four building and scaling a multi-market insurance platform serving the UK, Germany, France and Spain. I work across the whole delivery lifecycle, from technical design and API architecture through React and TypeScript front ends, automated testing and release into production. Alongside product work I build AI and automation systems that take manual process out of the business, including an agentic access control platform that closed an ISO 27001 audit finding and a document extraction pipeline handling 90+ fields per contract.

RELEVANT EXPERIENCE

Senior Software Engineer, Endava

Nov 2021 - Present

React, TypeScript, Node.js, REST APIs, Microservices, MSSQL, Azure, CI/CD, UiPath

- **Cut quote-to-bind from 30 minutes to 5** on a greenfield insurance platform launched into 4 European markets (UK, Germany, France, Spain), as one of a core team of 5 building the React and TypeScript front end against a versioned REST API layer over MSSQL.
- **Closed an ISO 27001 audit finding** and removed 200+ manual approvals per month by building an agentic access control system that autonomously evaluates software installation requests, bringing approval turnaround down from a full day to under an hour.
- **Eliminated days of manual contract data entry every month** by engineering a document processing pipeline that extracts 90+ structured fields per vendor contract at 90% field-level accuracy, with confidence scoring routing only low-confidence extractions to a human reviewer.
- **60% fewer integration defects** reached UAT after I standardised request and response contracts across 5 microservices spanning policy administration, contract lifecycle, payments and external partner systems, applying retry, idempotency and adapter patterns instead of letting each integration solve the same problems twice.
- **Unblocked 5+ strategic partner integrations** by architecting a versioned integration framework, introducing URL path versioning across the service estate so 5 live integrations kept running untouched while new market-specific contracts shipped in parallel.
- **Release cycle down from 3 hours to 2**, with recurring merge conflicts eliminated, after taking ownership of release management and branch strategy including the UAT backfill process and the Octopus Deploy CI/CD pipeline gating deployment to Azure.

Electronic Technician, Ultratech Int

Jan 2021 - Nov 2021

Industrial systems, root cause analysis, hardware debugging

- **Halved production line downtime** across 30 machines by tracing recurring industrial HMI failures to root cause and putting a preventative maintenance protocol in place.
- **Ramp-up time down from 8 weeks to 4** for 10 junior technicians, after I documented the fault trees the team kept rediscovering and coached them through structured diagnostic technique.

Freelance Computer Science Tutor, Self-Employed

Jan 2020 - Dec 2020

- **8 of 10 students improved by a grade band** over 50+ one-to-one C++ lessons, using adaptive assessments targeting each student's specific gaps rather than a fixed syllabus.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, SQL, Python
- **Backend:** Node.js, Express.js, REST API design and versioning, microservices and distributed systems
- **Frontend:** React.js, Next.js, React Native, HTML5, CSS3
- **Data:** MSSQL, MongoDB, MySQL, Redis
- **Cloud and DevOps:** Azure, Octopus Deploy, CI/CD pipelines, Git, GitHub
- **AI and Automation:** UiPath RPA, agentic AI systems, LLM API integration, intelligent document processing
- **Practices:** Agile (Scrum and Kanban), design patterns, unit and integration testing, code review, estimations, release management, production support, technical documentation

EDUCATION

Technical University of Cluj-Napoca

Oct 2017 - Jun 2021

Bachelor of Science in Electronics, Telecommunications and Information Technology

CERTIFICATIONS

- UiPath Agentic Automation Associate
- Harvard CS50x, Introduction to Computer Science
- Modern React Bootcamp
- Web Developer Bootcamp 2024
